SUBMISSION OF CERTIFIED COPY

Dear Sir:

A claim for priority is hereby made under the provisions of 35 U.S.C. § 119 for the above-identified United States Patent Application based upon Canadian Patent Application No. 2,389,815 filed June 18, 2002. A certified copy of said application is enclosed herewith.

In the event that there are any fee deficiencies or additional fees are payable, please charge the same or credit any overpayment to our Deposit Account (Account No. 04-0213).

Respectfully submitted,

Michael J. Bujold, Reg. No. 32,018

Figure 1. No. 1 is a piece of 4 inches by 8 inches Dakota vinyl, when not shaded but white, it means the cloth side of this piece is faced upward, if the shaded side shows it means the vinyl side is faced upward. Here 2 lines are drawn to make 2 pockets, the No. 2 folding line is 2 ¼ inches away from one and this piece and No. 3 folding line is drawn ¾ inch away from the other end of this piece.

Figure 2. Here the figure 1 piece is laid with the vinyl side upward and the 2 ends, No. 1 and No. 2 have been raised up and over and down again to make two pockets. No. 1 pocket, when folded is to be 2 ¼ inches deep and 3 inches wide when stapled with 4 staples, 2 on each side and ½ an inch away from the edges. As shown in No. 3, half-inch wide staples are used, or it could be sewn as well.

No. 2 pocket should be three quarters of an inch deep when folded, and 3 inches wide when stapled half an inch away from each side using 2 staples one on each side as shown in No. 4, when the pockets are inverted inside out you get the coin purse as in Figure 3.

Figure 3. Is the coin purse with coins in it. There are two Velcro pieces with glue on them, or they can be sewn on, both are three quarters of an inch long and three sixteenths of an inch wide. When they are attached to the coin purse as in No.1 and No.2, this keeps the purse to stay closed when closed. The Velcro pieces can be removed and stuck on the sides or where a person wants them.

Figure 4. is the side view of the coin purse.

Figure 5. is the side view of the coin purse when closed.

Figure 6. is the view of the coin purse when closed.

This coin purse could be made in different sizes and of different materials like cloth backed vinyl's, leather or imitated leather vinyl's which are soft, or canvas. The last two materials keep the purse more collapsed when closed.

The way this coin purse is made it allows to shuffle the coins back and forth and sideways, slide coins back into the coin pocket easily and close it with one hand.

There is no comparison with the convenience of this coin purse, and the patented coin purse No. 2,368,687 which requires two hands to shuffle the coins around to view.

There is another coin purse that also has the same principle when its being opened the coins could slide out to view and shuffle them back and forth and sideways; but the annoying thing is it's always bulky whether it is full of coins or empty and it costs several times more than this one will.

For all the features this coin wallet offers, it will be the most affordable coin purse on the marketplace because of its low cost designed construction.
